Company

U.S. Ordnance is a leading designer, developer and manufacturer of small arms. Founded and operated with the pioneering spirit of the Old West, U.S. Ordnance is forging its own distinct mark on American history. Since 1997, the Nevada based corporation has built military small arms, machine guns and replacement parts, with precision and superb workmanship.

Through strategic partnerships, U.S. Ordnance supplements its weapon systems with accessories and complementary products from the defense industry's leading manufacturers. Bundled with this winning combination is the progressive training and support you have come to expect from U.S. Ordnance.

To assure the continued product reliability, quality, innovation, and durability that U.S. Ordnance is known for, the company comprehensively tests its guns once assembled. This battery includes high-pressure testing; drop testing; environmental testing like mud, ice, heat, and water immersion; and magnetic particle inspection, using state-of-the-art testing equipment to detect flaws in the metal. Every weapon is repeatedly proof-fired for functionality and accuracy.

In addition, a U.S. government representative monitors various steps in the entire gun-making and testing process, ensuring each meets the requisite, superior standards.

This testing is carried out in U.S. Ordnance's newly built, clean and well-organized facility, which features state-of-the-art CNC mills and lathes, screw machines, and mil-spec plating facilities, custom rifling and chambering equipment, and a convenient, indoor firing range—all ISO 9001:2015 certified. The plant spans 100,00 + square feet amid high-desert sagebrush and scrub in McCarran, a rural area 20 minutes outside of Reno in the northern part of the Battle Born State of Nevada.

The U.S. Ordnance team consists of highly skilled, experienced and conscientious engineers, CNC machinists, armorers and support staff who strive to deliver impeccable products and constantly improve them to better serve the end users. They practice the company's strict code of ethics and commitment to integrity and excellence.

U.S. Ordnance sells its NATO sanctioned weapon systems the M2HB, M2A2 QCB, M3, M48, M240 GPMG, M240C, M240D, M60E6, M60D Enhanced, and MK19 MOD 3 to United States governmental agencies (law enforcement and the military) and federally approved foreign leaderships and militaries. It facilitates training for its products as well.
